Evaluate

Your 2027 AI roadmap with Claude in 5 steps

Save this before January

Swipe for the 5 steps

by **Christophe Atten**

Step 1 of 5

1

Collect everything

Paste your current use case list, this year's ideas and any user feedback. Ask Claude to organise them into one table with status and owner.

Prompt to copy

One table to start from.

```
Here is our list of live AI use cases, ideas from this
year and user feedback: [PASTE]

Organise everything into one table: name | status (live,
pilot, idea) | owner | team | tool | notes.
```

Step 2 of 5

2

Score and prioritise

Give it your criteria: frequency, effort, data readiness, risk, demand. Ask for a ranked list with the reasoning for each.

Prompt to copy — Use your criteria.

```
Score each idea from 1 to 3 on: frequency, time saved,
data readiness, risk if wrong (3 = low risk), team demand.

Rank them and explain the top five in one sentence each.
```

Step 3 of 5

3

Draft the one-page roadmap

Ask for a quarter-by-quarter view: three priorities, their milestones and what needs to be true before each starts.

Prompt to copy

Quarter by quarter.

```
Take the top three priorities and build a one-page roadmap for 2027:
quarter | priority | milestone | what must be true before it starts | owner.
```

Step 4 of 5

4

Find the risks

Ask: "What could stop this roadmap? Think about data, skills, budget, vendors and regulation." Add the answers to your plan.

Prompt to copy Before leadership does.

```
What could stop this roadmap? Consider data, skills,
budget, vendors and regulation.

List the five biggest risks with one mitigation each.
```

Step 5 of 5

5

Write the leadership summary

Once you've reviewed it, ask for a half-page summary for the CFO: what, why, what it costs, what it needs.

Prompt to copy — After your review.

```
Write a half-page summary of the roadmap for the CFO: what we will do, why, what it costs, what we need from leadership.
```

Before you start

One rule

Internal plans are usually fine in an approved tool. Vendor pricing and confidential project details depend on your policy. Check before you paste.
