8 Claude prompts for Excel work in finance

Formulas, models, inherited files

Swipe for all 8 prompts

by **Christophe Atten**

8 prompts I'd use, in Claude, ChatGPT or Copilot

1

Explain a formula

"Explain what this formula does, step by step, in plain English."

2

Fix a broken formula

"This formula returns #N/A for some rows. What are the likely causes and how do I fix them?"

3

Simplify

"Rewrite this nested IF formula in a simpler way. Keep the same result."

4

Document a model

"Here are the sheet names and key formulas. Write a one-page guide for the next person who uses this model."

Prompts 5 to 8 of 8

And the rest

5 Build a check

"Suggest five control checks I can add to this model to catch errors."

6 Clean data

"Give me the steps to clean this export: remove duplicates, fix dates, split names."

7 Pivot planning

"I want to analyse costs by entity, month and category. What's the best pivot layout?"

8 Review before sending

"Review this summary table for inconsistencies, totals that don't add up and labels that are unclear."

Before you start

Two rules

Share structure and formulas, not confidential data. And test every fix on a copy first.
